It all started in 1979 as one of few very first private stud farms established in Polish post II World War history and in the tough communistic times that made the breeding of "useless" delicate Arabian horses neither easy nor appreciated by the political system.

"Many times during our visits at Janów Podlaski auctions we had been thinking about purchasing mares but in those times in the auctions only foreigners could take part – Lech Błaszczak, the owner recalls - In 1988 the company Animex that was leading the auction let us to take part in it and buy the mare Magnolia (Fason – Maskotka) bred by SO Białka. Our persistence led us to success. We were the first Poles who purchased an Arabian mare during the auction in Janów. In 1990 we bought on the next auction the mare Alabania (Gwarny – Aleksja) bred by Janów Podlaski, owned by SO Białka and we got the trophy "ANIMEX TROPHY TOP BUYER POLISH PRESTIGE JANÓW

PODLASKI '90!". The 90's and the changes of the political system gave us great expectations of a quick improvement of our breeding but the changes were not that meaningful as we expected.

There were so many difficulties in getting the best stallions from the state studs and the breeding quality of the purchased mares was so weak that the offspring of our first mares - Magnolia, Galicja and Darowizna did not fulfill our breeding expectations. As a result these horses were sold. Only the mare Albania as a racing and endurance mare (and my strong persistence) led us to breed the distinguished racing mare Abisynia (Borysław – Albania). As a three-year-old mare she was unbeaten in her year. The show breeding breakthrough for us was the purchasing of three mares from SK Michałów in 1994 and in 1996 we gained another mare - Erudycja (Probat – Etola), with the filly Eklezja (Monogramm – Erudycja)".

Eiffa (Ekstern x Eklezja)

Elfera (Psytadel x Eiffa [Eklezja])

Erudycja line belonging to the most famous Polish show producing families, the E-line of Milordka through Ela-Etola (by Nabor) is still present and successfully continued in Michałów State Stud by this day. This purchase happened to be one of the best decisions in all over 30 years of Mr Blaszczyk breeding life until now, and the success was not awaited long. In 2002 as one of the first Polish private breeders Mr Blaszczyk decided to take his home bred horses to international scene with a big kick off! So the first daughter of Eklezja – Ekspiacja by Emigrant was sent to Scott Allman's training center. With the result of 89,33 points took the third place in her class at the International B-Show Wels 2002.

"The next breakthrough in our breeding and also a great stimulus in development of private studs was the year 2004 when Poland joined the European Union. - Mr Blaszczyk continues - That was an open gate to the free access to the semen of the best stallions and it was easier to perform in the

shows in the whole Europe, to learn and to look at the newest trends in world's breeding. The offspring of our P-line mares: Pliszka, Passa and also E-line of Erudycja-Eklezja brought us many successes in the further years."

Granddaughter of Eklezja – Espiria (Psytadel – Ekspiacja [Eklezja]) was a spectacular show mare with the career as following: XVI Junior Spring Show Bialka 2007: 4h place in her class with 89, 67 points, Int. Eklezja is one of the few still rare mares that in relatively short history of Polish private breeding managed to establish her own, steady, successfully and consistently producing show and breeding offsprings. Moreover in her whole breeding career so far she produced 9 foals including 7 fillies and only two colts!

It is 33 years being passing this year of the breeding program of Slowianin Agro Stud, one of the very first Polish private Arabian horse farms in Polish post II World War history. On this great celebration we offer you to have a deep
